In the original use, a quantity of finely chopped pork, beef, or other meat, spiced and flavoured, enclosed in a short length of the intestine of some animal, so as to form a cylindrical roll (usually, one of the 'links' formed by tying the containing intestine at regular intervals); later also, in generalized sense, meat thus prepared. In the 19th c. the application of the word has been greatly extended; in its widest use, it denotes a preparation of comminuted beef, veal, pork, mutton, or a mixture of these, either fresh, salted, pickled, smoked or cured, with salt, spices, flour (sometimes with the addition of fats, blood, sugar, vegetables, etc.), stuffed into a container made from an intestine, stomach, bladder, or other animal tissue.

There are more than 150 kinds of sausage, distinguished by names indicating the ingredients and the method of

manufacture. They are divided into two classes, in the U. S. known as *dry sausage*, which is a cured product, subjected to a process of drying lasting several weeks, and *fresh* or *wet sausage*.

The *β* forms may partly represent the OF. *sauve* in collocation with a fem. sb., and partly the ME. form of the plural adj. The use of a nominative after *save* (see 1 b) may perhaps be a trace of the originally adjectival character of the word; it is, however, to be noted that the same thing occurs with all the quasi-prepositional words of the same meaning, including even *saving* and *excepting*, which are in origin pr. ppples. of transitive verbs.]

In the United Kingdom there are four classes of these institutions: *trustee savings banks*, which are under the control of the National Debt Commissioners (with whom the whole of their funds must be invested), but are locally managed by bodies of trustees, who are prohibited from receiving remuneration for their services; savings banks for the army, navy, and merchant seamen, established respectively by the War Office, the Admiralty, and the Board of Trade; *post office savings banks* (see POST OFFICE); and *voluntary savings banks*, which are private establishments not under government control.

On the one hand the ME. *saverey* might descend (with substitution of v for ð) from OE. *sæðerie*, a. early OF. **saðereie* (later *sarrie*, whence the dim. *sarriette* surviving in mod.Fr.) = Pr. *sadreia* (whence 16th c. On the other hand, Heresbach (*De Re Rustica*, 1570) cites an It. *savoreggia* and F. *savoreie*, and the latter appears in Cotgr. 1611 as *savorée*. The existence of these forms suggests that the ME. *saverey* may be an adoption of an unrecorded OF. form which had the *v* either as a phonetic development in hiatus (cf. F. *pouvoir* for early OF. *pooir*) or through the influence of *saveur* SAVOUR.

Independent adoption of the Latin word appears in OE. *saturege*, ME. SATUREIE, MHG. *saterje* (G. *satureil*, It. *satureja*, corruptly *santoreggia*, Pg. *saturagem*.]

OE. *seax* (:—**sahso-*) knife, SAX, f. pre-Teut. root **sok-*: **sek-* to cut; cf. L. *secāre* to cut.]

1. A cutting tool consisting of a plate (or, in some forms, a band or a tube) of metal (usually steel), one edge of which is formed into a continuous series of teeth. (Some saws for cutting stone are without teeth.) In the original form of the tool, represented by the HAND-SAW, and in some varieties of more modern invention, e.g. the pit-saw (see PIT *sb.*¹ 14), the saw is moved backwards and forwards, each movement in one direction deepening the groove or 'kerf' made in the wood or other material to be cut. In other varieties, as the circular saw and the band-saw, a continuous movement in one direction is substituted for the reciprocating movement.

Ordinarily *saw* means the complete instrument including the handle, frame, or the like, necessary to fit it for use; but sometimes the word is applied to the 'saw-plate' or 'saw-blade' alone.

Also with defining words, indicating special varieties of form, structure, mode of operation, or purpose, as in *band saw, circular saw, compass saw, drag saw, endless saw, frame saw, fret saw, gate saw, hand saw, ice saw, joint saw, keyhole saw, lock saw, meat saw, mill saw, panel saw, pit saw, rabbet saw, rip saw, sash saw, tenon saw, web saw*. These terms, so far as they have been thought to require notice in this Dictionary, are treated either under their first element or as main words. A considerable number of kinds of saws used for surgical purposes are distinguished by the names of their inventors, as *Butcher's, Ferguson's, Gowan's, Hey's, Liston's saw*.

OTeut. **sagējan, *sagjan* :—pre-Teut. **sokēi-*. The root is perh. WIndo-germanic **soq*^u^-: **seq*^u^, found in Lith. *sakýti*, OSl. *sočyti* to say, Gr. *ἐνεπε* imper. (:—**en-seq*^u^*e* — OLatin *inseque, insece*), *ἐνισπεῖν* aorist inf., to tell, say, L. *inquiam* I say (:—**in-squ-am*).

The normal mod. Eng. phonetic representative of the OE. inf. *sęgan* (or the 1st sing. pres. *sęcge*) would have been **sedge*. As in the case of Buy *v.*, Lie *v.*[1], the mod. form comes from OE. forms which had *g* (palatal) instead of *cg*, as imp. *sęge, sæge*, 2nd sing. pres. ind. *sęgest, sægst*, 3rd sing. pres. ind. *sęgeð, sægð*. The *g* represents WGer. *g*, and the *cg* WGer. *gg*; the OTeut. stem **sagj-* having become by phonetic law in W.Ger. **saggj-* before an inflexional suffix beginning with a vowel, and **sagi-* in any other position. In Middle English, alongside the tendency, which ultimately prevailed, to extend the stem *seȝ-, sei-, sai-* (:—OE. *sęg-*) to all parts of the verb, there existed an opposite tendency to extend the stem *segg-* beyond its etymological limits. Hence [illegible]

B. Signification.

In Eng., as in other Teut. langs., *say* is an approximate synonym of *speak*, from which it differs in having normally as its object a particular word or series of words, or a sentence representing the meaning of a particular series of words. Cf. L. *dicere* and its representatives in Romanic (which, however, have also senses that are now expressed in Eng. by *tell*), and L. *aio, inquam*.

As the word designates not the action of speaking itself, but its relation to the object, its use with reference to written expression does not ordinarily, like the similar use of *speak*, involve any consciousness of metaphor.

1. *trans.* To utter or pronounce (a specified word or words, or an articulate sound). Also, in wider sense, used *of an author or a book*, with quoted words as object.

For various idiomatic collocations, as *to say nay, to say bo, to say farewell*, etc , see the conjoined words.

For *as who saith, as who should say*, see As and Who.

9. To recite or repeat (something that has a prescribed form); occas. to recite from memory, in contradistinction to reading. Often in traditional collocations, as *to say grace*, *a lesson*, (*a*) *mass*, *a prayer*, (*one's prayers*).

In ritual use *say* and *sing* are sometimes equivalent; but *say* is the wider term, and seems often to have been applied distinctively to recitation without note.

10. On the analogy of expressions like 'let us say', 'shall we say?', etc. (referable to senses 1–3), where the verb has contextually the sense of 'suppose', 'assume', the imperative say is idiomatically used: a. to introduce a clause, with the sense 'supposing', 'on the assumption *that*'; b. parenthetically, to indicate that a preceding sentence expresses a supposition or a selected instance; c. prefixed to a designation of number, quantity, date, etc. to mark it as an approximate guess or as representing a hypothetical case.

In commercial documents *say* is also used, without any implication of inexactness, to introduce any varied repetition of a numerical or quantitative statement: e.g., 'a shipment of 215 (say two hundred and fifteen) tons of coal'; 'thirteen stones (say 182 pounds)'; 'four editions of 2000 copies each,

or say in all 8000 copies'. Cf. Ger. *sage*, Da. *siger*, Sw. *säger*; the two last are indicative present, either 1st or 3rd pers. sing.; Du. has *zegge* (old form of *zeg*, 1st pers.), and Fr. has *je dis* similarly used.

AF. **escauberc* (recorded only in pl. *escaubers*, *-erz*, 'vaginas', 'dolones', Joannes de Garlandia, 13th c.), *escauberge* (13th c. in *Registr. Malmesb.*, Rolls Ser., I. 55), latinized *eschauberca* (an. 1204 in *Rot. Chart.* 134/1).

Evidence of the existence of the word in continental OF. has not yet been found, as J. de Garlandia, though resident in France, was an Englishman. The form represents an earlier **scalberc*, *-berge*, which must be an adoption of a Teut. compound, the last element of which contains the root **berg-* to protect (cf. Hauberk). No such Teut. compound has, however, been found. As to the origin of the first element two suggestions have been made: (1) that it is OHG. *scala* shell, husk, which does not yield a very satisfactory sense; (2) that **scalberc* is altered by dissimilation from **scarberc*, from OHG. *scâr*, *scâra*, ordinarily meaning 'scissors', but occas. used as a designation for a sword. The Icel. *skálf-r* scabbard, *skálm* short sword (? a. Gr. σκάλμη), *skálm* 'one part of a cloven thing' (Vigf.), pl. bean-pods, have some resemblance in form and sense, but the possibility of etymological connexion is very doubtful.]

For the OE. *scealu* the inflexion appears to attest the short vowel in all the senses. The WGer. **skăla* (:—OTeut. **skēlā*, *skalā*) passed into OF. as *eschale*, *escale* cup (med.L. *scala* 'patera'), also husk (mod.F. *écale*). For the Teut. root **skel-* : *skal-* : *skēl-* to separate, divide, cf. SHALE, SHELL, SKILL. See also SKELE.

Between the first quarter of the 13th c. and the 16th c. the *α* forms (containing the vowel *a*) represent the northern pronunciation, the *β* forms being midland and southern. In the 16th c., however, the northern *scale* seems to have found its way into the London dialect, being used by Palsgrave and later by Spenser and Shaks. In the 17th c. *scale* is the prevailing literary form, though *scole* (with other equivalent spellings) occasionally appears down to the middle of the century.]

App. invented by Tindale (1530) to express what he believed to be the literal meaning of Heb. עזאזל *ʿăzāzēl*, occurring only in Lev. xvi. 8, 10, 26. 2. Originally used to express a restrictive qualification, = 'barely', 'only just'; hence also, = 'barely, or not quite', 'only just, if at all'. In mod. use the original sense survives only in definite statements of fact. In sentences relating to belief, expectation, or estimation, the word now (as occas. in ME.) serves as a restricted negative (= 'not quite'). Often, however, the qualification really relates, not to the contents of the sentence in which the adv. occurs, but to the degree of the speaker's belief: thus 'You will scarcely maintain this proposition' is equivalent to 'I cannot quite believe that you will maintain', etc. Cf. Scarce *adv.* and Hardly *adv.*

Scarf (skāɹf), *sb.*2 Also 5 scarffe, 6 skarfe, 8 scarfe, 8-9 scarph, 9 skerf. [Words of related form and identical meaning (chiefly belonging to the nautical vocabulary) are found in several mod. langs., but recorded much later than in English: F. *écart* (:—**escarf*) a scarf, vbl. noun from *écarver* (:—**escarver*) to scarf; Sp. *escarba*, Pg. *escarva* a scarf; Du. *scherf* a scarf, *verscherven* (whence G. *verscherben*) to scarf; Sw. *skarf*, Norw. *skarv* piece added to lengthen a board or a garment, also the joint or seam by which this is effected; Sw. *skarfva*, Norw. *skarva, skjerva* to lengthen by joining or sewing on an additional piece (Da. has in this sense *skarre*, the relation of which to the Sw. form is obscure).

The relation of these words to each other and to the English sb. and vb. is uncertain. The fact that the Sw. words are not, like those in the other langs., exclusively technical, but have a wider meaning, seems to afford a slight presumption in favour of Scandinavian as the ultimate source. But even assuming this, it remains doubtful whether the Eng. sb. comes from Sw. (or some other Scandinavian dialect) directly or through the medium of OF. **escarf.*

OF. *escarlate* sb. fem. (mod.F. *écarlate*) = Pr. *escarlat* masc., *-ata* fem. In Fr. and Pr. recorded from the 12th c.; the other Rom. forms are later: Sp., Pg. *escarlate, -ata*, It. *scarlatto*, med.L. *scarlat-(t)um, -a, scarlettum* (1204 in *Excerpta Historica* 393). In Teut. the word appears as ON. *skarlat, skallat*, MHG. *scharlât*, early mod.Flem. *schaerlat*; also, with etymologizing alteration (cf. LAKE *sb.*[5]), MHG. *scharlach* (*-en*, MLG., Du. *scharlaken* (whence Da. *skarlagen*, Sw. *skarlakan*, Icel. *skarlak, skarlakan*). From It. are prob. mod. Gr. σκαρλάτον, Church Slav. *skrilato*, Serbian *skrlet* Turk. *iskerlet*.

If the OHG. *scarlahhan*, in a gloss explained as 'shorn cloth' (*rasilis*) be identical with this word (the interpretation as well as the form being due to popular etymology), it is the earliest evidence of its existence. It is hardly possible that this OHG. word can be the source of the Rom. forms. The prevailing view is that OF. *escarlate* is an alteration of Pers. سقلاط *saqalāt, siqalāt, suqlāt*, a kind of rich cloth, a derivative of which appears as CICLATOUN. (The form سقرلاط *saqirlāt*, given in some Arabic dictionaries, is modern and prob. adopted from some European language.)]

† *Scarlet in grain* (*s. engreyned, graynet* s., etc.): cloth fast dyed of a scarlet colour (cf. GRAIN *sb.*[1] 10 and INGRAIN *a.*). It is doubtful whether 'scarlet *and* grene', frequently occurring in ME. poetry in descriptions of splendid attire, originated in a misunderstanding of this phrase.

The ME. spelling with *sch-* is of doubtful phonetic interpretation: in most of the verse examples the word thus written alliterates with *sk-*, and must therefore be regarded as of Scandinavian etymology; but some of the other instances may possibly (though there is no definite evidence) represent the native word.

The Teut. root **skaþ-* is believed to represent an Indo-germanic **skath-*: *skēth-*; cf. Gr. ἀ-σκηθής unscathed.]

It is true that in ME. *scatter* occurs only in northern and midland texts, with one exception (quot. 1330, sense 3); and that in this sole southern instance the MS. spells it with *sch*, which should normally stand for (ʃ). The Du. and MLG. *schateren* to resound, to laugh uproariously (MLG. once, to be shattered by an explosion) would seem to be onomatopoeic; at least their sense cannot easily be derived from that assigned to the alleged Teut. root. 5. A subdivision of an act of a play (or of a short play which is not divided into acts), marked by the entrance or departure of one or more actors (and, in romantic or non-classic drama, often by a change of *local*). Hence, the action and dialogue comprised in any one of these subdivisions; a situation *between* certain actors.

In editions of the Roman dramatists, and of the French classic dramatists, the entrance or exit of any actor makes a new numbered 'scene'. In the English drama, on the other hand, the 'scene' is a distinct subdivision of the act, marked by the fall of the curtain or the leaving of the stage empty; even when the *local* and the actors remain the same in two consecutive 'scenes', the stage is not supposed to have been occupied continuously through the interval.

6. The material apparatus, consisting chiefly of painted hangings, slides, etc., set at the back and sides of the stage, and intended to give the illusion of a real view of the *local* in which the action of a play takes place; the view thus presented to the spectators at any time during the action of a play. Also, any one of the painted hangings, slides, etc. used for this purpose.

On the Elizabethan stage, the curtain or hanging at the back of the stage, concealing the vestry or green-room, stood in lieu of scenery. Painted scenes and elaborate machinery, the representation of buildings or landscape in perspective, etc., were a principal feature of the privately-produced masques of Jas. I and Chas. I and, later, of the operatic play (see OPERA 2).

Sch. This sequence of letters corresponds in present or past English spelling to the various sounds or combinations of sounds ʃ, tʃ, sk, s, stʃ.

In ME. it was one of several modes of expressing the sound (ʃ), represented in OE. by *sc*, and in mod.E. normally by *sh*. With this value it continued to be used in Sc. down to the beginning of the 17th c. In ME. *sch* was sometimes miswritten for *ch*, pronounced (tʃ). In this Dictionary the words occurring in early texts spelt with initial *sch* which are not entered with this spelling will ordinarily be found under *sh* or *ch*.

In modern spelling *sch* has the value (ʃ) only in a few alien words from German (e.g. *schnapps*), in *schist* (of Gr. origin, influenced in pronunciation by German) and its derivatives, and in the abnormal (British) pronunciation of *schedule*. Formerly *sch* was often used for (ʃ), after German and French example, in transliterations of Oriental words, as in *shekinah*, *schah*, *haschisch*; but in these *sh* is now almost universally used instead.

In mod.E. (sk) is the normal pronunciation of *sch* in words of classical derivation, where it represents L. *sch*, Gr. *σχ*. (The only exceptions are *schist* etc. and *schedule*, mentioned above, and *schism* etc. for which see below.) *Sch* is also pronounced (sk) in Italian words, e.g. *scherzo*. In Du. words the native pronunciation of *sch* is (sχ) initially and (s) finally; but in the few Du. words with initial *sch* that are used in English without change of spelling the English custom is to substitute (sk).

In ME. texts initial *sch* sometimes occurs where the alliteration or [illegible] nounced (sk). [illegible] Teut. words e[illegible] with (ʃ), and the other from ON. with (sk), and as both forms were used by the West Midland and Northern alliterative poets, they were often confused by the scribes. The existence of etymological spellings like *schole* for *scole* (School *sb.*[1]), which occur sporadically from the 13th c, may have had some effect in suggesting the use of *sch* as a symbol for (sk).

The only words in which *sch* now represents (s) are *schism* and its derivatives, the pronunciation of the ME. form *cisme* (from OF. *cisme*) having survived although the spelling has been altered in accordance with the ultimate etymology. A similar explanation applies to the now obsolete pronunciation of *schedule* as (se·dɪul).

The pronunciation of *sch* as (stʃ) occurs only medially in words like *escheat*, *eschew*, *discharge*, where the *s* and the *ch* belong to different syllables.

It is doubtful whether this is to be read as *scólu*, with irregular *u* due to some analogy, or as *scólu*, which might be an adoption of L. *schóla* with original short vowel (perhaps from the pronunciation of Britons: cf. Ælfric *Gramm.*, Præfatio). The OE. *scolu* troop (see SHOAL) which is often confused with this word, is certainly unconnected.

[Of uncertain origin; recorded early in the 18th c. as *skooner, scooner*; the present spelling, which occurs only a few years later, may be due to form-association with *school*, or with Du. words having initial *sch.* The word has passed from English into most of the European langs.: Du. *schooner, schoener*, G. *schoner, schooner, schuner* (recorded 1786), F. *schooner, schoaner*, Da. *skonnert*, Sw. *skonare, skonert.*

The story commonly told respecting the origin of the word is as follows. When the first schooner was being launched (at Gloucester, Mass., about 1713), a bystander exclaimed 'Oh, how she scoons!' The builder, Capt. Andrew Robinson, replied, 'A scooner let her be!' and the word at once came into use as the name of the new type of vessel. b. Contradistinguished from *art*: see ART *sb.* 8.

The distinction as commonly apprehended is that a science (=ἐπιστήμη) is concerned with theoretic truth, and an art (=τέχνη) with methods for effecting certain results. Sometimes, however, the term *science* is extended to denote a department of practical work which depends on the knowledge and conscious application of principles; an *art*, on the other hand, being understood to require merely knowledge of
habit.

4. In a more restricted sense: A branch of study which is concerned either with a connected body of demonstrated truths or with observed facts systematically classified and more or less colligated by being brought under general laws, and which includes trustworthy methods for the discovery of new truth within its own domain.

1725 WATTS *Logic* II. ii. § 9 The word science, is usually applied to a whole body of regular or methodical observations or propositions,..concerning any subject of speculation. 1794 HUTTON *Philos. b. with defining word.

The many conflicting systems proposed in recent times for the classification of the sciences, and the need frequently arising (apart from any formal classification) for a common designation applicable to a group of sciences that are related by similarity of subject or method, have given currency to a large number of expressions in which the word *science* is qualified by an adj. The application of these collocations, so far as it is not obvious, is explained under the adjs. Among the most prominent of the adjs. designating particular

classes of sciences are: *abstract, concrete, biological, descriptive, exact, experimental, historical, mathematical, mechanical, moral, mixed, pure, natural, physical.*

1795 BURKE *Let. to Earl Fitzwilliam* Wks. IX. 1, I am not sure, that the best way of discussing any subject, except those, that concern the abstracted sciences, is not somewhat in the way of dialogue.

5. The kind of knowledge or of intellectual activity of which the various 'sciences' are examples. In early use, with reference to sense 3: What is taught in the schools or may be learned by study. In mod. use chiefly: The sciences (in sense 4) as distinguished from other departments of learning; scientific doctrine or investigation. Often with defining adj. as in 4 b.

In the 17th and 18th c. the notion now usually expressed by *science* was commonly expressed by *philosophy*.

b. Also *attrib.*, as in *science-class, -master, -teacher, -teaching.*

Scientific (sə͡iˌĕnti·fik), *a.* and *sb.* [ad. late L. *scientificus*, f. *scient-em*, pr. pple. of *scīre* to know (or perh., less regularly, f. *scienti-am* knowledge: see SCIENCE) + *-ficus* making, f. *facĕre* to make. Cf. F. *scientifique*, Sp. *científico*, Pg., It. *scientifico.*

The ultimate source of the word is to be sought in Aristotelian expressions like that in *Post. Anal.* I. ii. 71 b), where it is said that unless certain essential conditions are fulfilled, a syllogism will not be demonstrative, 'for it will not produce knowledge' (οὐ γὰρ ποιήσει ἐπιστήμην, rendered in the translation attributed to Boethius 'non enim *faciet scientiam*'). In pursuance of the suggestion of this phrase, the translator in the same chapter renders συλλογισμὸν ἐπιστημονικόν by 'syllogismum epistemonicon, *id est facientem scire*', and in I. vi. uses 'scientificæ demonstrationes' for αἱ ἐπιστημονικαὶ ἀποδείξεις. In this application the word survived in Latin text-books of logic down to Aldrich, though some of them have instead *scientiam pariens* or *faciens scire.*

From having been thus employed as a contextual interpretation of ἐπιστημονικός (pertaining to science or knowledge; = med.L. *scientialis*, the L. *scientificus* was afterwards used inappropriately (instead of *scientialis*) in the 13th c. translation of Aristotle's Ethics (VI. i. § 6) to render this Gr. word where it designates the theoretic as opposed to the deliberative faculty of the soul. This use was followed by Aquinas [illegible] *scientifico* is used [illegible] Oresme (14th c.). [illegible] subsequent Latin, in the Rom. langs., and in English, has been 'pertaining to science'; it is merely by a contextual accident that in phrases like 'scientific investigation' the word admits of being interpreted in its etymological meaning. Aq [illegible] learned', [illegible] lateness of the first appearance of the word in English is remarkable.]

The last sense, rare in the simple vb., is prominent in most of the compounds (as *abscīdĕre, concīdĕre, incīdere, excīdĕre*); hence the late L. use of *cīs-* instead of *cæs-* in derivatives related to this sense.

The spelling with *sc*, first found in the 16th c., appears to be due to etymologizing confusion with L. *scissor*, agent-n. f. *scindĕre* to cut, split, rend. (Cf. also *scythe.*) There appears to be no evidence of this confusion at an earlier date, though in Eng. mediæval documents *scisser* (written also *cissor, cisor*) was the usual Latin word for a tailor.]

Scorn (skɔ̄ɹn), *sb.* Forms: *α.* 2–3 skarn, 3 scarn, scharne. *β.* 2–7 scorne, 3–4 schorn, 3–7 skorn, 4 schorne, 4–7 skorne, 6 *Sc.* scrone, 2– scorn. [Early ME. *skarn, scharne*, aphetic a. OF. *escarn, escharn* = Pr. *esquern-s*, Sp. *escarnio*, Pg. *escarnho*, It. *scherno*; a Com. Rom. word of Teut. origin: cf. OHG. *skern*, MHG. *schern*, OS. *scern*, early mod.Du. *scherne* mockery, sport.

The β forms, which both in the sb. and in the vb. appear equally early with the α forms, are not easy to account for. The remarkable similarity of form and sense with It. *scornare*, lit. to deprive of the horns (:—popular L. **ex-cornāre*, f. L. *cornū* horn), hence to disgrace, slander, deride, *scorno* (vbl. sb.) dishonour, insult, contempt, has given rise to the suggestion that the form of the Eng. words may have been influenced by OF. *escorner* (mod.F. *écorner*) to deprive of horns. But although the Fr. verb occurs (rarely) in the 16th c. with the sense 'to put to confusion', 'to mock', this seems to be a late adoption from Italian; OF. *escorner* has, besides its literal meaning, only the transferred sense to despoil. In the 16th and 17th c. the It. word may perh. have influenced the Eng. literary use.]

Scot (skɔt), *sb.*¹ Forms: 1 *pl.* Scottas, 3–6 Scotte, 4 Skot, Skotte, 6 Skott, (Skote), 7 Scott, 5– Scot. [OE. **Scot*, pl. *Scottas*, ad. late L. *Scottus*; first in writers of *c* 400. Late Latin had a variant *Scōtus* (cf. med. Gr. Σκῶτος), which became the usual form in med.L. A third form, *Scōtus*, may perh. be inferred from the ON. *Skotar* pl., though the examples of it in med. Latin verse are prob. mere mistakes.

The source of the late Latin word is obscure. There is no evidence that it represents the native name of any Gaelic-speaking people (the Irish *Scot*, an Irishman, pl. *Scuit*, appears to be a learned word from Latin), nor does it exist in Welsh, though Welshmen in writing Latin have from the earliest times used *Scoti* as the rendering of *Gwyddel* (Gaels). It may possibly be an adoption of a name bestowed at an early period by Britons or Gauls on a Gaelic people (cf. the Gaulish personal names *Scottes, Scottico*); Sir J. Rhŷs has suggested that it may have meant 'tattooed', cogn. w. 1. *Hist.* One of an ancient Gaelic-speaking people, first known to history as inhabitants of Ireland, who in the 6th century A.D. settled in the north-west of Great Britain, and from whom the northern part of the island ultimately received its name.

Down to the reign of Alfred, *Scottas* was the ordinary word for Irishmen (as *Scotland* for Hibernia). In the next reign there were relations between the Anglo-Saxon kingdom and the kingdom of the Scots in North Britain, and from that time onward the name was no longer associated with Ireland except in historical statements.

Scotch (skɒtʃ), *a.* and *sb.*[3] Also 7 Scot'sh. [Contracted var. of SCOTTISH.

The three forms of the adj., *Scotch, Scottish, Scots*, are still current, with some difference in use, which, however, is somewhat unsettled. Down to the middle of the 16th c. the only form used in southern English was *Scottish*; but in the dialect of Scotland (and in that of the north of England in the 14th and 15th c.) the form was *Scottis* (cf. *Inglis* = English), subsequently contracted to *Scots*. So far as our quotations show, the contraction of *Scottish* into *Scotch* is

recently *Scotch* has been the prevailing form in England, though *Scottish* has always been in use as a more formal synonym. In Scotland, the authors who wrote in dialect (down to Ramsay and Fergusson early in the 18th c.) used *Scots*, while those who anglicized adopted the form *Scottish*. Put before the end of the 18th c. *Scotch* had been adopted

or less regularly, while in England *Scotch* is the ordinary colloquial word, the literary usage prefers *Scottish* in applications relating to

the nation or the country at large or its institutions or characteristics. Thus it is usual to speak of 'Scottish literature', 'Scottish history', 'the Scottish character', 'a Scottish lawyer', 'the Scottish border'. On the other hand, it would sound affected to say 'a Scottish girl', 'a Scottish gardener,' and there is no alternative for expressions like 'Scotch tweeds', 'Scotch whisky'. Although 'the Scottish dialect' is now the usual designation, it is seldom that *Scottish* is used as a sb. instead of *Scotch*. Recent usage favours *Scots* in 'Scots law', and it is now almost universal in historical references to money, as 'a pound Scots'.]
